Art Unit: 1638

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 11 and 14-21, drawn to fusion proteins, classified in class 530, subclass 300, for example.
- II. Claims 22-23, drawn to a plant virus or plant comprising a fusion protein, classified in class 800, subclass 288, for example.

The inventions are distinct, each from the other because:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different functions.

The fusion protein of Group I is physiologically and biochemically distinct from the living plant or nucleic acid-containing virus of Group II. Furthermore, the fusion protein of Group I could be made by a process other than the expression of a nucleic acid in a plant virus or plant, such as chemical synthesis.

The recombinant virus and plant of Group II require methods of gene synthesis and gene introduction, as well as methods of plant tissue culture, each not required by the invention of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, classification, and fields of search, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
